ROSENDIN ELECTRIC RECEIVES INTEL'S PREFERRED QUALITY SUPPLIER AWARD

SAN JOSE, California, March 13, 2009 – Rosendin Electric has received Intel Corporation's Preferred Quality Supplier (PQS) award recognizing their significant contributions to Intel in 2008. Rosendin supplies Intel with electrical construction services, deemed essential to Intel's success. Rosendin and 25 additional suppliers are recognized as 2008 PQS award winners.

"We are honored to be recognized by Intel with this notable award for the fourth year in a row. Achievements of the past have greater meaning when they are surpassed by achievements in the present and pale in comparison to achievements yet to be realized. Intel's leadership continues to be the catalyst for positive change in the construction industry," said Tom K Sorley, chairman and CEO, Rosendin Electric.

"Congratulations to Rosendin Electric for earning the Preferred Quality Supplier award," said Bill Keady, Construction Enterprise Engineering director, Intel Corporation. "Receiving this award four years in a row is a reflection of Rosendin's consistent strong commitment to safety, quality and execution on Intel projects. We look forward to Rosendin's continued support and collaboration on future projects as we continue to strive for the highest standards."

The PQS award is part of Intel's Supplier Continuous Quality Improvement (SCQI) program that encourages suppliers to strive for excellence and continuous improvement. To qualify for PQS status, suppliers must score 80 percent on a report card that assesses performance and ability to meet cost, quality, availability, delivery, technology and responsiveness goals. Suppliers must also manage and deliver on a challenging improvement plan and a quality/business systems assessment. Furthermore, the 2008 awardees had to demonstrate basic compliance to the Electronic Industry Code of Conduct and Intel's Green Sustainability Program. Additional information about the SCQI program is available at <http://supplier.intel.com/quality/scqi.htm>.

Celebrations will be held in Tokyo, Japan and Santa Clara, California during the month of March 2009 to honor the PQS award winners. In addition, there will be an online advertisement launch and acknowledgement on Intel's website.
