ROSENDIN ELECTRIC RECEIVES INTEL'S PREFERRED QUALITY SUPPLIER AWARD

Rosendin Electric was named a recipient of Intel Corporation's Preferred Quality Supplier (PQS) award for outstanding performance in providing products and services deemed essential to Intel's success. The company was recognized for its efforts supplying Intel with electrical construction services. Rosendin Electric and 43 additional PQS award winners were honored at a celebration in Burlingame, California on March 27.

"Improvement is one thing, but continuous improvement is what drives a company forward. Receiving this notable award from Intel for the second year in a row acknowledges the quest for excellence of our 100 percent employee owned company," said Tom Sorley, president and CEO, Rosendin Electric. "We applaud Intel for establishing standards of excellence for the construction industry. Their recognition inspires us to reach higher and deliver greater value to the customers we serve."

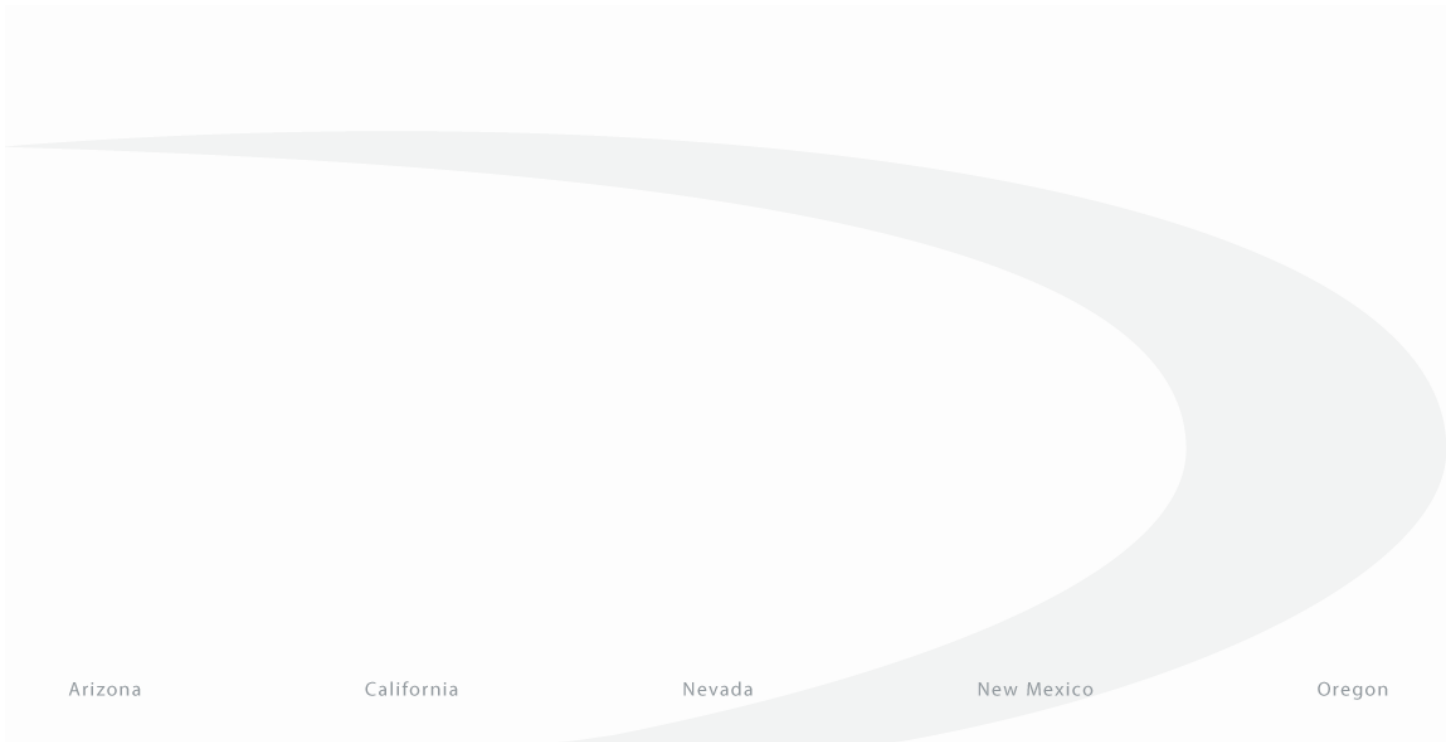

"In 2006 the construction industry experienced dynamic growth conditions and unforeseen material cost volatility. In these adverse conditions Rosendin Electric was able to optimize their resources to support Intel's construction roadmap," said Ted Haig, general manager of Construction, Intel Corporation. "They provided cost savings through competitive bids and innovative execution, demonstrated the highest quality installations, and provided leadership to our world class safety programs. This is why Intel is proud to recognize Rosendin Electric with the PQS award for the second consecutive year."

The PQS award is part of Intel's Supplier Continuous Improvement (SCQI) process that encourages suppliers to strive for excellence and continuous improvement. To qualify for PQS status, suppliers must score 80 percent on a report card that assesses performance and ability to meet cost, quality, availability, delivery, technology and responsiveness goals. Suppliers must also manage and deliver on a challenging improvement plan and a quality systems assessment. Additional information about the SCQI program is available at <http://supplier.intel.com/quality/>.

Intel also recognized PQS award winners with an advertisement in the U.S., Europe, and Asian editions of The Wall Street Journal.
