

City of San Jose Foothill Park Light Pole Replacement

SAN JOSE, CA

Remove and replace street lighting with new, modern fixtures

CLIENT

City of San Jose

DURATION

2 Months

SIZE

**3 - 800lb Concrete
Light Poles**

Rosendin replaced 3 – 800lb concrete light poles at Foothill Park for the City of San Jose. The existing poles were approximately 40-50 years old and were inaccessible for servicing due to the steep terrain. A crane was used to reach 250' from the roadway to remove the old poles and replace with new hinged poles with internal winches for future servicing. The new LED fixtures will make the park brighter and safer for years to come.
