

Temple Data Center

TEMPLE, TX

New \$800 million data center in Temple, TX

CLIENT	Confidential
GC	JE Dunn
DURATION	Ongoing
BUDGET	\$800 Million
SIZE	900,000 SF

Rosendin has been selected to build a new \$800 million data center building and site infrastructure in an industrial park 50 miles north of the Austins, Texas Metro area.

The 900,000 SF data center aims to serve as a model of energy efficiency and will be supported by renewable energy from new solar energy plants. The project will also aim for LEED (Leadership in Energy and Environmental Design) Gold certification and receive credits for water restoration efforts.
